Documentation
CT30A3204-project

Technology choices

Project backend node.js + express. (express-generator --view=pug).

Frontend pug + javascript.

Database is MongoDP and an address is "*mongodb://127.0.0.1:27017/projectdp*".

Authentication uses JWT.

Responsive design is implemented with materialize.

Other technology choices:

Check register data: express-validator
View engine: pug
For encrypting passwords: bcryptjs
Load environment variable: dotenv
Use of formdata : multer
MongoDP use: mongoose
For authentication: jsonwebtoken, Passport, passport-jwt
Automatic restart: nodemon

Installation
Use "*npm install*" to install node modules.

User manual
Use "*npm run dev*" or "*npm run start*" to start server. "*dev*" starts server with nodemon and "*start*" starts server with node.

Go to "*http://localhost:3000/*"
